

CONNECT 2022

March 3th, TU Delft

**Precision and
Microsystems
Engineering**

EVENT INFORMATION

CONNECT 2022 is the networking event for the High Tech industry to bring soon to be graduate MSc students from the Precision and Microsystems (PME) department at the Delft University of Technology in contact with High Tech companies within the Holland Instrumentation Network (HI). Like previous editions, CONNECT will be co-hosted by YIN (representing HI) and Taylor (representing the PME student association).

The program consists of 4 parts:

1. An introduction by the PME department of TU Delft.
2. A 3 minute pitch – Each of the attending companies can pitch their company.
3. In-between break-outs – Where students and companies can meet. During these break-outs companies get the opportunity to talk with students, answer questions and present their company profile in more detail.
4. Networking drinks – An opportunity for the students to freely join any breakroom to ask questions.

PROGRAM INFORMATION

Location: Precision & Microsystems Engineering, TU Delft

Date: 03-03-2022

Cost: € 200, - (excl. VAT) per participating company

Preliminary Program:

Time	Activity	Location	Comments
